Our Clients

Who We Are

Custom designed technology solutions.

FUTUREBOX is an audio visual and IT specialist company that provides cost effective yet cutting edge AV and IT solutions for our clients. We exceed expectations by keeping up with trends, ensuring that our AV and IT services use the latest and most efficient technology that will continue to be reliable in the long term. Our most distinctive feature is our customer focused approach combined with our technical expertise, which means we take the time to understand individual needs and provide tailored designs and recommendations to meet your specific objectives and budget. As AV and IT specialists, we are approved suppliers and installers of leading brands giving you surety that you can rely on the equipment to operate seamlessly and offer full training so you understand how to control and benefit from your solution.

Our Work

AV experts – exclusive suppliers, tailored design, professional installation and expert training.

Designing, supplying, installing and maintaining audio visual and IT solutions is what we do, and we do it very well. We have worked with many Corporate, Education, Leisure, Medical, Hotel, Government and Retail clients and can also support consumers in their own home to install, set up and demonstrate their AV equipment. So, as you begin to see, we are very experienced in what we do. Here at FUTUREBOX we have a commitment to staying in touch with, and ahead of, industry trends with an objective to exceed all your expectations. This allows us to give you a cost effective, high quality, future proof solution featuring the latest, best and most reliable technology available to engage your customers.

Our Culture

Talented, committed and responsible people from diverse backgrounds are Essential for us to fulfill our purpose of reimagining AV technology.

We strive to unleash the power of our people and we cultivate a company culture that is inspired, curious and empowered.

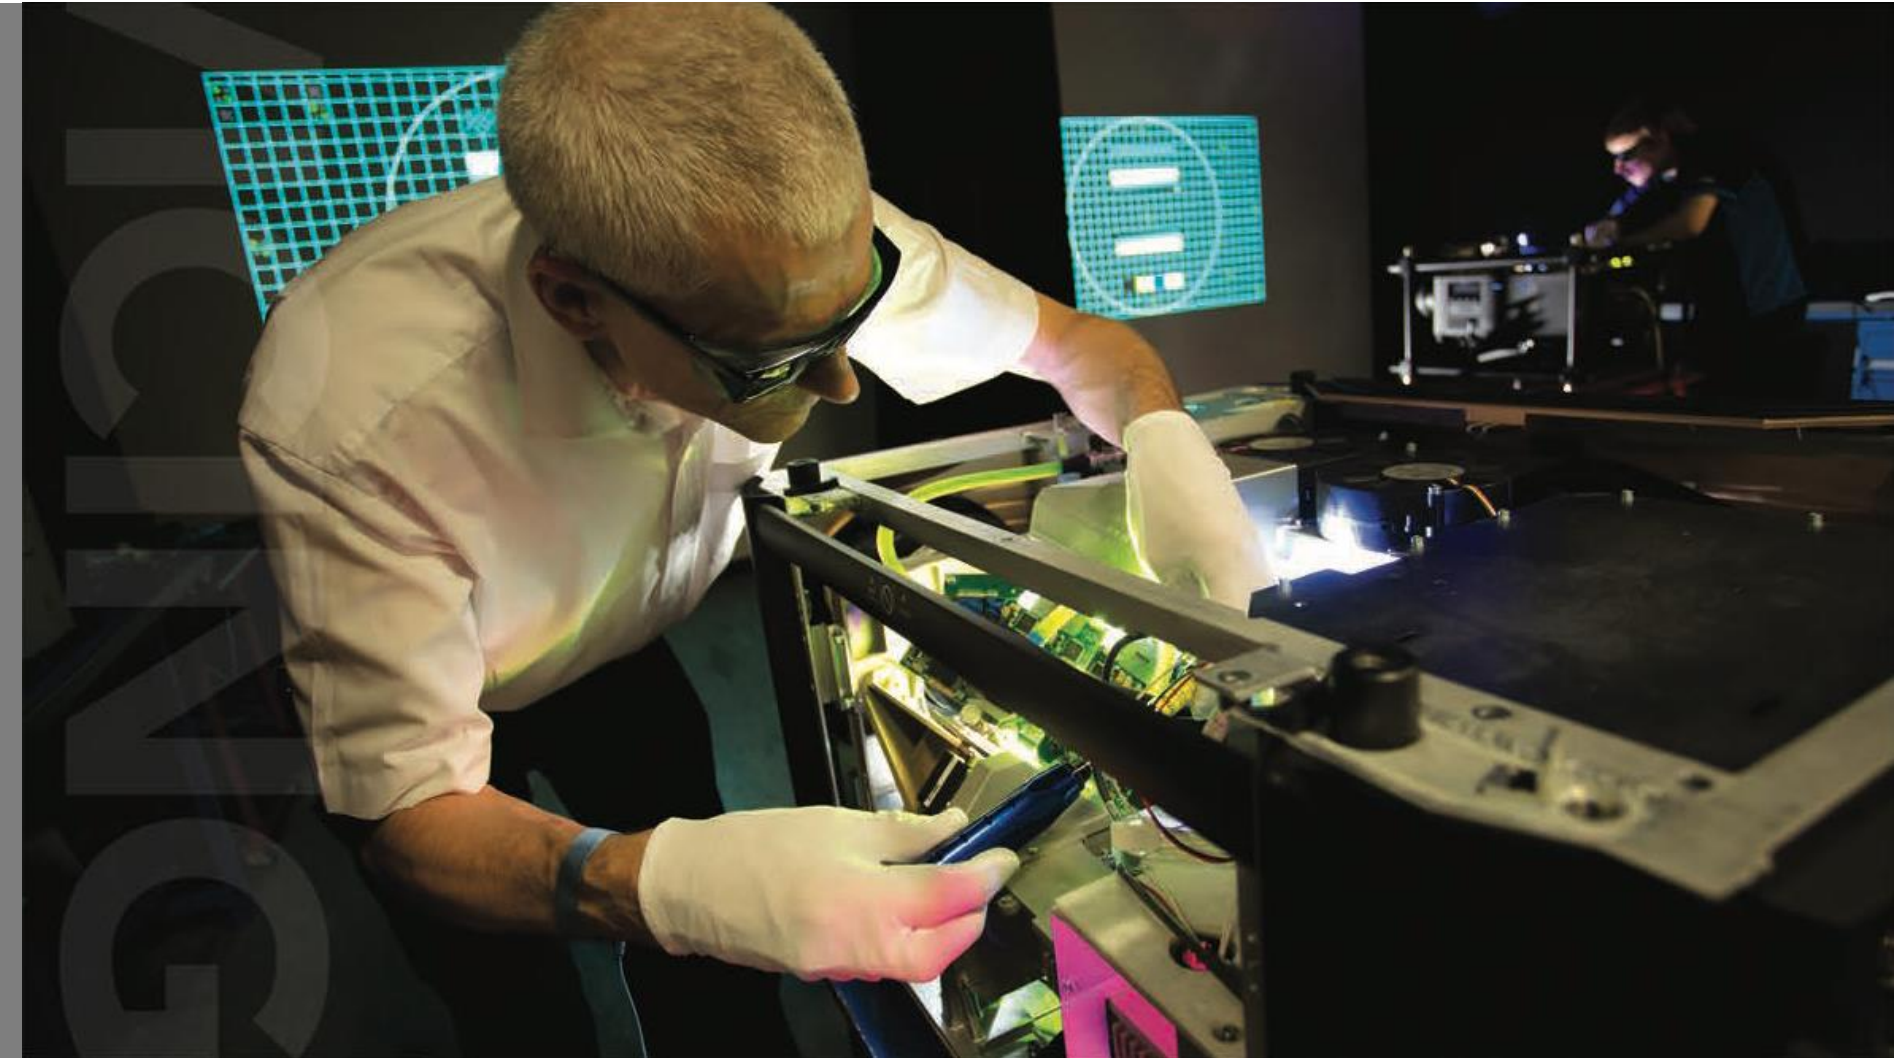

Our Values

"Our values are part of our DNA"

They guide the way we work with our business partners, within our communities and with each other.

Through integrity, accountability, passion, humility, simplicity and a focus on success, we have created a vibrant company culture where ideas can blossom, people can thrive and success can flourish.

Technical Support

Futurebox has experienced and certified technical personnel.

Futurebox has all the necessary investments and knowledge to provide high-quality service and customer satisfaction and meets the all necessary installation and maintenance requirements for professional audiovisual systems, which makes a difference by providing high quality and fast service to domestic and abroad companies.

Employees are the most important resource for Futurebox. While keeping up with the latest technologies and customer services standards, Futurebox has dedicated itself for providing high quality and fast service to the customers with its' employees, who are experts in their individual branches.

Why Futurebox?

Futurebox is committed to ensuring our customers are always satisfied with the quality of the equipment we install, the service they receive from us, and the conduct of our staff. Developing and maintaining long term, mutually rewarding relationships with our clients, business partners and staff, is central to our business.

We deliver what we promise and this is clearly reflected in what they have to say about us.

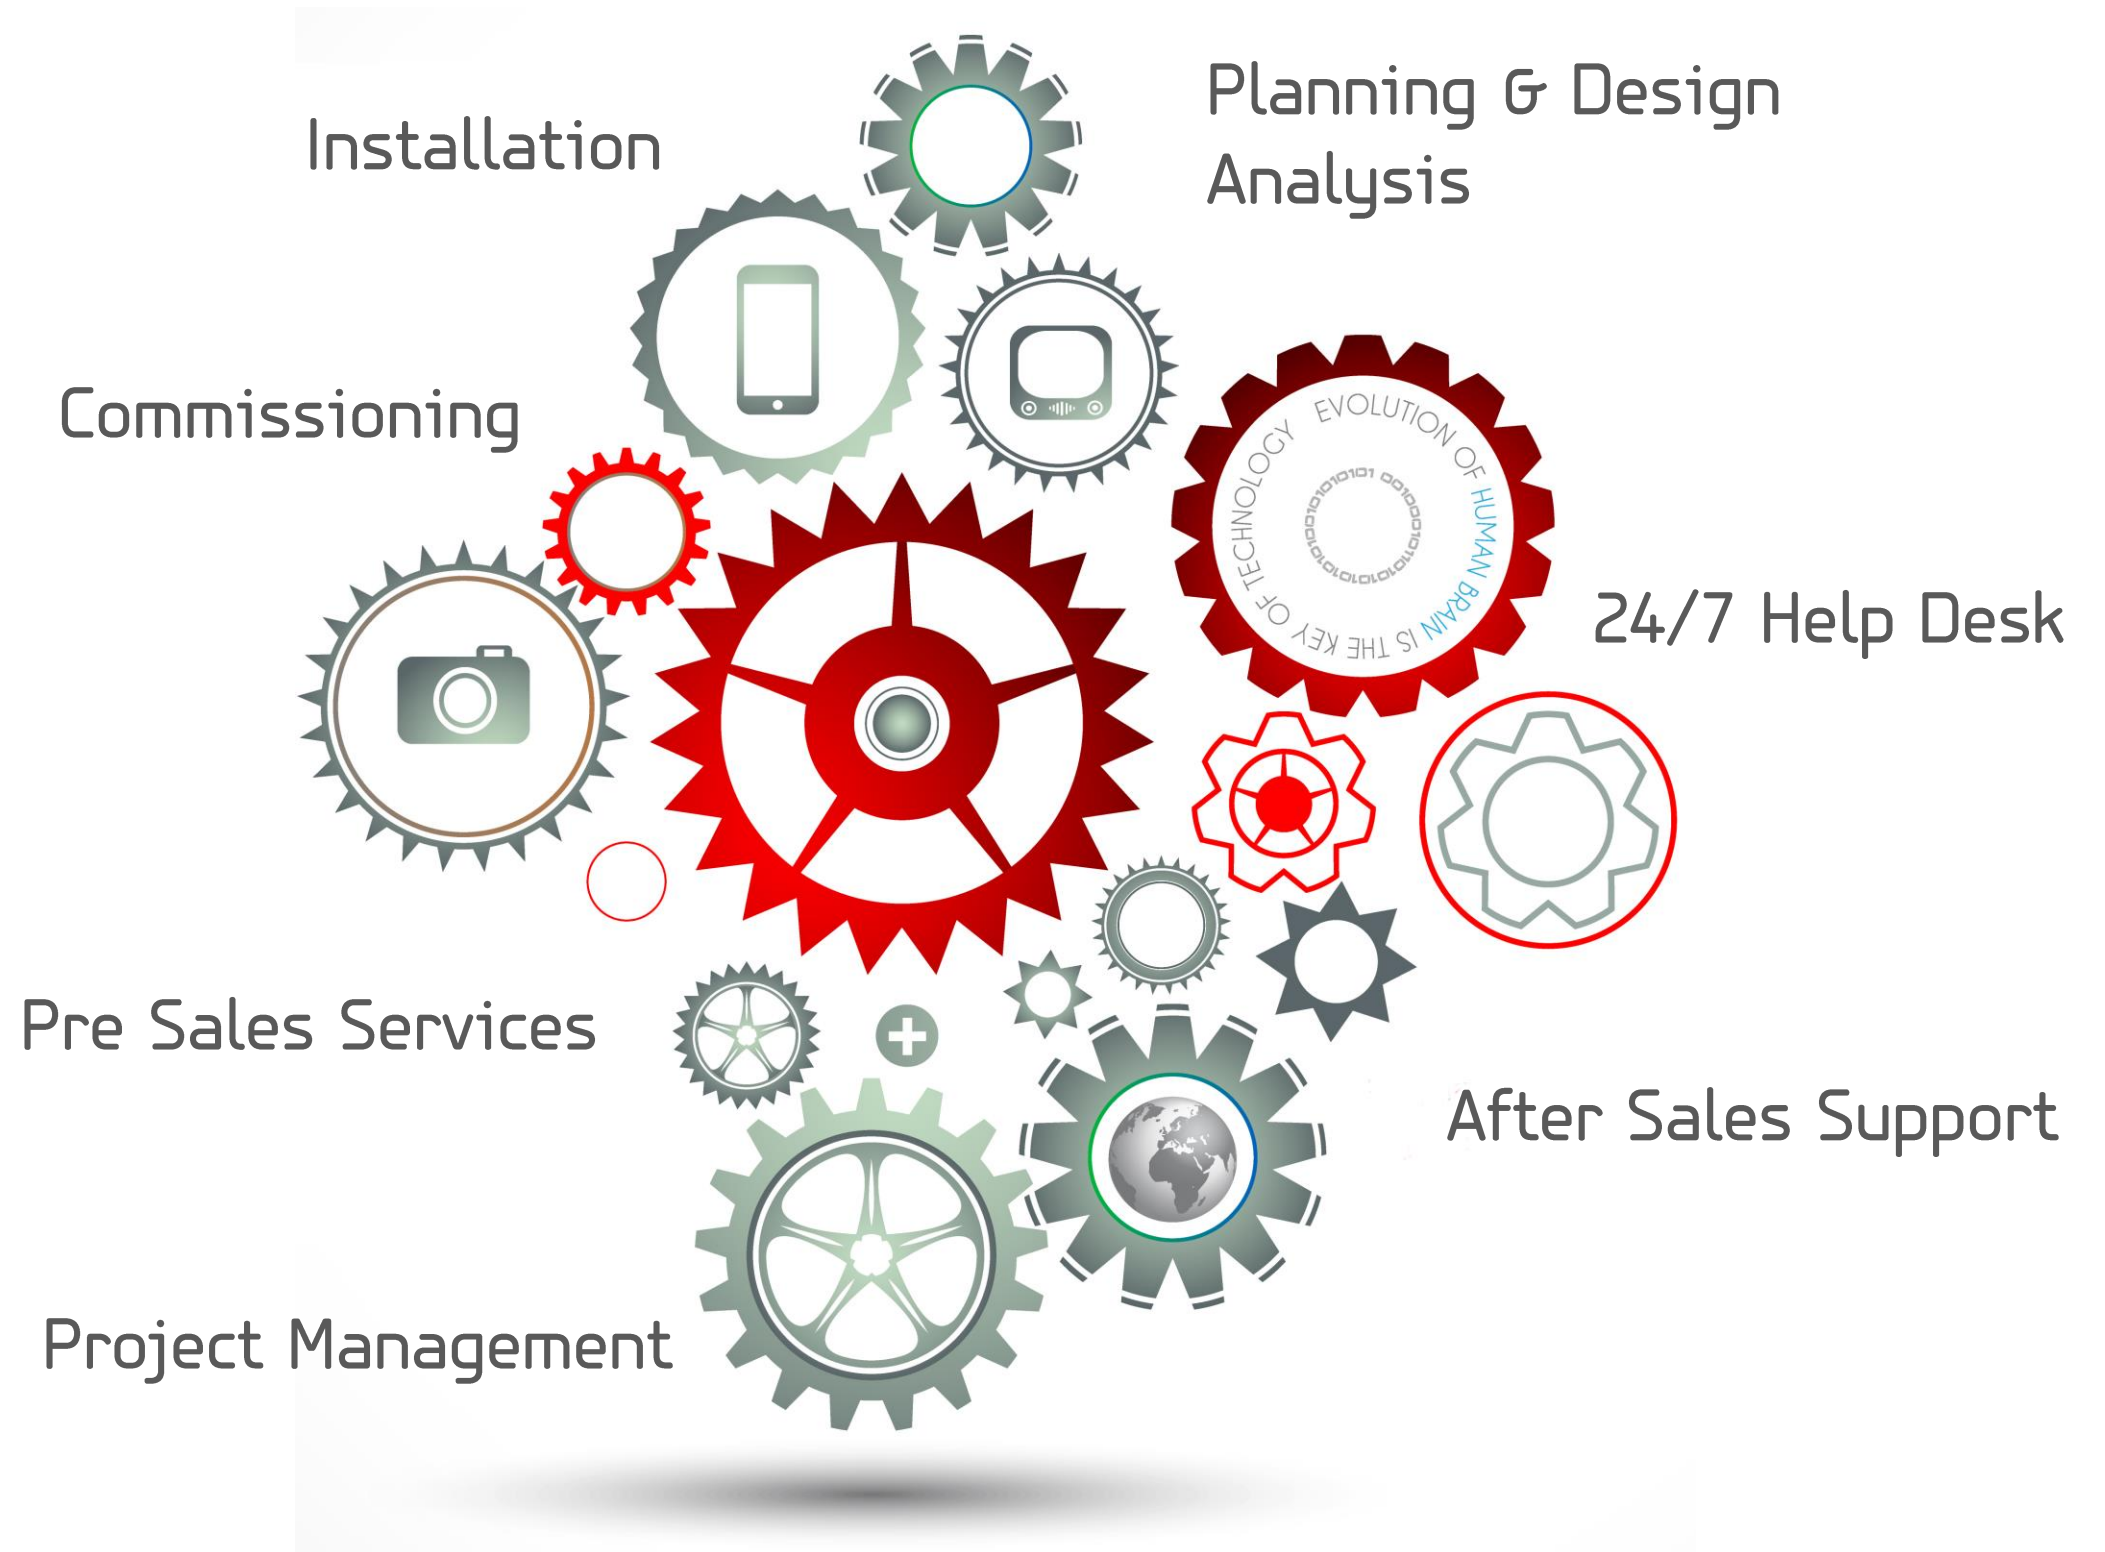

Systems Integration

Futurebox offers unparalleled expertise in designing and installing professional audio visual solutions that integrate IT, sound, distributed audio, lighting, HD video displays, video conferencing and AV control systems in environments that range from collaborative corporate spaces, to large stadiums.

Our in-house service department provides AV technicians, repairs and managed services programs to assist businesses with AV systems equipment and maintenance.

Regardless of how large or small your needs, our team has the experience, talent and knowledge to design and install a perfectly integrated audio visual system with specific technical needs or custom designed control features.
